

Introducing training

Expert training

...over 98% of delegates recommend our courses*

When it comes to learning software, you need a trainer who understands the product inside out, who is experienced in training both new and more advanced users and who understands the needs of your organisation. Look no further....

Our Professional Services Consultants, spearheaded by our Training Manager, deliver courses to hundreds of delegates each year, either at our training suite in the Midlands or at clients' premises.

Training Managers choose us because we offer a choice of competitively priced public or bespoke courses, and they know that their delegates will be trained to a high standard in a supportive environment. Delegates choose us because our courses are well paced and include quality course materials plus one month's free post-course support to help them implement what they learn.

We gather feedback from all delegates to ensure our courses continue to meet delegates' needs, and we are proud of our high levels of customer satisfaction. Our delegates consistently give us top scores for explanation and tuition, opportunities for questions and the amount of time spent hands-on with the software. We restrict the number of delegates on our courses to eight to ensure that each delegate receives a high level of personal support, and our delegates appreciate this.

Our public courses cover our most popular software products (listed right). We also offer bespoke courses on these products, plus RouteFinder for MapInfo, Engage Crime Profiler, GBM Mobile, SuperPOSe Desktop GML and NTF Editions and Introductory sessions on all of our digital data products.

To discuss your requirements, call Craig Dean on 01527 556920 or email training@dottedeyes.com. Alternatively, visit www.dottedeyes.com/training to download course outlines and check public course availability.

"Speed of course is excellent, not too fast, plenty of opportunities to practice during the course."

"I have attended a GIS course delivered by a competitor, but would highly recommend Dotted Eyes to anyone interested in training on GIS"
